News 01. Finished Events for 2017

With our latest participation in Marintec China 2017 and BWMTech Conference London this month, we have had all planned exhibitions and conferences for 2017 successfully done.

Moreover, Techcross' new system called ECS-Hychlor™ System, based on indirect electrolysis technology, was unveiled at Kormarine 2017. After Sales service remote support system was also introduced to clients to provide the better service during exhibitions and conferences.

Techcross, as the BWMS total solution provider, keeps trying to come up with the right solutions in respect of BWMS matters to all of our clients and hope to meet at various events in the next year.

News 02. 2018 Business Plan Workshop

Techcross held the Business Plan Workshop 2018 on December 12 to discuss how to cope with maritime recession and enhance the quality of service and market share. Not just sharing the agenda, they actively discussed the issues of each division in great detail. Especially, they had an opportunity to build up the specific sales strategy for the retrofit market and look into the new businesses going forward.

Providing Right Solutions For Your Ships

News 03. Achieved a Type Approval from Greek & Panamanian Government

Greek & Panamanian Government issued type approval for ECS (Electro-Cleen™ System) of Techcross on 7th and 24th November 2017. All of its line-ups, including explosion-proof type and entire capacity of the system are applicable to this approval. With this approval, Techcross hopes to serve the customers with their registry in Greece & Panama in more efficient way. Especially, it is the first type approval issued by Panamanian Government in the BWMS industry. Techcross has secured 8 flag states type approvals and 7 classification society type approvals so far.

News 04. Participated in Korean Technology Promotion Seminar

KOMEA (Korea Marine Equipment Association) held the Technology Seminar for ship owners, shipyards and engineering clients of ASEAN (Association of South-East Asian Nations) members on November 8 at Amara Hotel in Singapore.

The seminar mainly consisted of the latest maritime issues, such as ballast water management system, green ship and environmental regulations. Techcross also attended as one of speakers and presented market status and technology of ballast water management system. KOMEA hope that Korean manufacturers will expand the business opportunity in Singapore by promoting superiority of their product through the seminar.

News 05. Selects Techcross as a Pioneer Company of International Environmental Regulation

On October 20, Techcross won an Excellence Award from Department of Commerce, Industry at the ceremony 'Pioneer Company of International Environmental Regulation' in Korean Chamber of Commerce and Industry. Techcross, as a frontier to protect marine environment with its own superb BWMS called ECS, gained high praise for the pioneering position with its earlier entry in this new industry as well as overwhelming global market share. The ceremony was one of the section in the 11th International Environment Regulation Expo hosted by KITECH (Korea Institute of Industrial Technology).

News 06. Giving a Lecture on BWM and Systems to Techcrossian

Internal experts of Techcross gave a special lecture on overall Ballast Water Management and technical aspects of ECS to all of Techcrossian. The course consisted of BWM rules & regulations, global market status and ECS technical principles, merits over the others. The lecture, needless to say, was meaningful in enhancing the market understanding and productivity from the audience and it also contributed to a stronger internal bond within Techcross.
